## INTRODUCTION

The fourth and last volume of Nicholas Copernicus' Complete Works contains the facsimiles of the original sources which were published in Volume III. This is comparable to the relation between the facsimile of the autograph of the Revolutions contained in Volume I and its edition in Volume II.

The initial project of the Complete Works involved three volumes only. The idea of reproducing all of Copernicus' minor works in a facsimile edition matured during the preparation of Volume III. The decision to issue Volume IV was in a sense a natural consequence of Copernicus' rank among the founders of modern science. But it was also due to the fact that a unique collection of photographs of manuscripts preserved in twenty libraries and archives of eight European countries has been assembled over the years at the Centre for Copernican Studies of the Institute for the History of Science, Education and Technology of the Polish Academy of Sciences. The publication of such a complete set of documents, reflecting more than forty years of Copernicus' creative life, seems to be bringing a certain stage of historical research to a close. His personality and his writings are now easy of access, and easily placed within the framework of the general culture of his times. This should eliminate, once and for all, errors and misunderstandings due to the lack of direct access to the sources.

Unlike Volume III, which was arranged according to subject matter and chronology, in what follows, Copernicus' autograph texts are presented first, followed by manuscript copies of his writings on money and on astronomy, and by two printed books published during his lifetime.

Plate I opens the volume, showing, greatly enlarged, the seal of Copernicus' signet-ring with the image of Apollo, which he used in his private correspondence. In turn, the series of official letters written by Copernicus on behalf of the Varmia Chapter is preceded by the seal of that Chapter showing the Madonna and Child (Plate XX).

Plates II-IV present drawings and photographs of watermarks G, H, I, found on paper used for documents written by Copernicus. These watermarks follow the watermarks C-F found in the manuscript of the Revolutions, which were reproduced and described in Volume I. A drawing of the watermark from the Uppsala Notebook (Plate XXXIV) featuring an ox head may be found in L. A. Birkenmajer, Mikolaj Kopernik, Cracow, 1900, p. 155.

Watermark G pictures a hand with a rolled sleeve and a clover-leaf on a rod above the middle finger. This watermark is found on paper used in four letters of the Varmia Chapter written by Copernicus in 1520 (Plates XXIII-XXVI), and also in Copernicus' Inventory from the same year (Plate XXXIX). Watermark G resembles closely watermark no. 11465, coming from Maestricht, 1516, reproduced in C.M. Briquet, Les filigranes, Paris-Genève, 1907.

Watermark H features a double cross beneath a crown. It is found on two folios of the Guardians accounts, one of which, f. 6 (Plate XL, 124/125) filled with Copernicus' writing, is dated 1531, while the other, f. 8, not reproduced in this volume, is filled with Tiedemann Giese's writing and dated 30 April 1532. Watermark H resembles closely watermark no. 1805, known from Kaunas, 1532, and reproduced in E. Laucevicius' catalogue *Popierius lietuvoje*, Vilnius 1967, as well as watermark no. 138, dated 1527, known from the State Archives of Gdańsk, document 300,53 (file II) reproduced by

J. Siniarska-Czaplicka, Filigrany papierni polożonych na obszarze Rzeczypospolitej Polskiej od początku XVI do połowy XVIII wieku, Wrocław 1969. According to this last author the double cross was the emblem of the Order of the Holy Spirit, which possessed, at Czerwony Prądnik near Cracow, land on which the first paper mill in the vicinity of this city was erected in 1493. Paper produced by this mill after 1506 had no other watermark but the double cross.

Finally, watermark I depicts a pot of flowers with the letters RP in its middle part. It is found only once, that is, in Copernicus' letter to Duke Albert of Prussia, dated 21 June 1541 (Plate XIV). None of the watermarks representing a pot, reproduced by Briquet nos 12701–12814, contains all the features of watermark I.

Copernicus' manuscripts include his private correspondence (Plates V-XVI), as well as letters which he himself wrote on behalf of the Varmia Chapter (Plates XXI-XXXI). The later ones are published in the Polish and Latin versions of Volume III, but not in its English version.

Plates XXXII-XXXVI show annotations in books. Here again the tables and notes to be found in the *Alphonsine Tables*, in Regiomontanus' tables (Plate XXXIII), and in the *Uppsala Notebook* (Plate XXXIV), as well as medical prescriptions inscribed in Montagnana's *Consilia* (Plate XXXVI, 88-91) are only published in the Polish and Latin versions of Volume III. Its English version, however, along with all the other language versions includes the recipes for the 'imperial pills' (Plate XXXV) and for the 'pills for the stomach' (Plate XXXVI, 87, not in Copernicus' hand).

Copernicus also wrote personally most of his administrative documents, namely: the draft proxy concerning his Wrocław scholastry (Plate XXXVII), the Leases of Abandoned Farmsteads (Plate XXXVIII, 93-106), the Inventory of 1520 (Plate XXXIX), the Guardians' accounts (Plate XL), and the Bread Tariff (Plate XLIII, 129). One page of the Leases, however, was written by Tiedemann Giese (Plate XXXVIII, 107), and one folio of the Bread Tariff by Felix Reich (Plate XLIII, 130). Furthermore, two of Copernicus' letters have been preserved in later copies (Plates XVII, XVIII), and his approval of a financial transaction is found in a document written by a scribe (Plate XLI).

Copernicus' draft proxy mentioned above is preserved in the Archivio Notarile at Padua. The Diocesan Archives at Olsztyn possess three letters of the Varmia Chapter to Bishop Maurice Ferber and the draft of the Chapter's letter to Płotowski, all four items written by Copernicus, as well as the extant folio of his Leases and the complete text of his Inventory of 1520. Six personal letters to Bishop Dantiscus, one letter from the Varmia Chapter to the same bishop, four letters from the Chapter to Bishop Fabian of Lossainen and a letter from Henry Perigh to this last bishop, all written by Copernicus, are preserved at the Czartoryski Library at Cracow. Two letters to Duke Albert of Prussia written by Copernicus in German, the Varmia Chapter's Guardians' accounts and the Chapter's letter to King Sigismund I of Poland, all coming from the former Königsberg archives, are now preserved at the Geheimes Staatsarchiv at Berlin, while one personal letter of Copernicus to Dantiscus may be found at the Staatsbibliothek in the same city. Finally, the Library of the University at Uppsala possesses Copernicus' books with the notes reproduced in the present volume, his Bread Tariff, one of his letters to Bishop Ferber, and one to Dantiscus.

One of Copernicus' lost letters has been preserved in a facsimile published in Edinburgh in 1821 (Plate XIX), while a photograph of another one, lost in the interwar

#### INTRODUCTION

period, is available at the Olsztyn Diocesan Archives (Plate V). A part of the Leases (Plate XXXVIII, 93-104) and Copernicus' letter to Felix Reich (Plate XLII) are preserved in photographs taken before 1945, now in Hans Schmauch's collection in Munich. These photographs are our most immediate records of the originals.

Copernicus' writings about money and his minor astronomical works are preserved in various handwritten copies.

His earliest study of money, described as *Meditata* (private reflections) and dated 15 August 1517 is known from three copies. One of these copies, from 1522, was lost during the second world war at the archives of Gdańsk; it is reproduced here from a photograph, now in the Hans Schmauch collection in Munich (Plate XLIV). Two other contemporary copies come from the *Libri legationum* at the Central Archives of Historical Records at Warsaw (Plate XLV), and from *Górski's Files* at the Ossolineum Library at Wrocław (Plate XLVI). Both copies are almost identical: the former was found by Marian Biskup in 1984, while the latter has been known since the nineteenth century. A single page of an eighteenth–century copy of the same text, coming from Gdańsk, is also reproduced (Plate XLVII).

The manuscript of 1522, containing the German version of the *Meditata* prepared in 1519, and labelled *Denkschrift* in Volume III of the *Complete Works* is preserved at Gdańsk (Plate XLVIII). The *Denkschrift* was published by Caspar Schütz in *Historia rerum prussicarum* (Plate XLIX, first edition, Zerbst 1592). Toruń archives are in possession of a unique copy of a Latin translation–summary of the *Denkschrift*, dating from the end of the sixteenth century (Plate L). This Latin translation–summary has not been included in the English version of Volume III.

Copernicus' Essay on the Coinage of Money (1525-1526) has been preserved in three contemporary copies. One of these copies was written by Felix Reich (Plate LI), one belonged to Friedrich Fischer, chancellor to Duke Albert of Prussia (Plate LII, both copies now at Berlin), while the third belonged to Bishop Maurice Ferber (Plate LIII, now at Cracow).

The Commentariolus, being a first draft of Copernicus' planetary system, written before 1514, is known from three manuscript copies, namely: Duncan Liddel's copy dated 2 November 1585 and preserved at Aberdeen (Plate LIV), a copy which survived in Stockholm, bound together with a copy of the second edition of the Revolutions which belonged to Johannes Hevelius, a seventeenth-century astronomer from Gdańsk (Plate LV), and a copy, made after 1589 for Christian Sørensen Longberg (Longomontanus) preserved at Vienna (Plate LVI).

In a letter of 3 June 1524 to the cartographer and royal secretary Bernard Wapowski, his fellow-student at the University of Cracow, Copernicus gave a report on a short treatise by a Nuremberg astronomer, Johann Werner on the Motion of the Eighth Sphere. A passage from this letter, which has come to be known as Copernicus' Letter against Werner, was published in Tychonis Brahe Dani de mundi aetherei recentioribus phaenomenis, 1588 (Plate LVII). Three manuscript copies of the letter are preserved at Oxford (Plates LVIII-LX). They were made by professors Henry Savile in 1578, Thomas Smith in the seventeenth century, and Stephen Peter Rigaud at the beginning of the nineteenth century. An earlier copy, now at Schweinfurt (Plate LXII), was made in 1569 by the German astronomer Johann Praetorius. The copy preserved at Vienna (Plate LXII) is dated 30 March 1575, the copy preserved at Berlin (Plate LXIII) was

probably written after 1571, while that which survived at Uppsala (Plate LXIV) bears no date and no indications of its origin.

The Strasbourg manuscript of the Letter against Werner had been copied in Prague in January 1531, and it was destroyed when the Strasbourg municipal library burned down in 1870 during the Franco-Prussian war. Luckily, the manuscript was copied at Strasbourg in June 1839 by Antoni Makowski. Makowski's copy, the fate of which is unknown, was in turn transcribed before 1875 by Leonard Niedźwiedzki, who inserted a Polish translation between the lines of the Latin text (Plate LXV). A second transcription of Makowski's copy, prepared at the Academy of Arts and Sciences in Cracow in 1899, was offered to the municipal library of Strasbourg to replace the old manuscript destroyed in 1870 (Plate LXVI).

The facsimiles of two small books printed during Copernicus' lifetime complete the volume. First comes his translation of Theophylactus Simocatta's, Ethical, Rustic and Love Letters, Cracow, 1509 (Plate LXVII; the booklet was reproduced once before: Wrocław, 1953); next comes the table of sines published as an Appendix in his Sides and Angles of Triangles, Wittenberg, 1542 (Plate LXVIII). This table of sines has never been published since its first edition. It is reprinted and explained in the Polish and Latin versions of Volume III, but not in its English version.

All the manuscripts reproduced in the present volume were inspected by its editor in the various libraries and archives in which they are preserved. Their detailed descriptions made on those occasions were of great help in preparing the edition. The dimensions of the separate documents are given in the List of Plates to an accuracy of 5 mm. Documents bigger than the size of our volume have been reduced in size, while all remaining materials are reproduced to a 1:1 scale.

The facsimile was prepared at the Drukarnia Narodowa (National Press) in Cracow, using modern scanner techniques. It is based on black and white photographs, but the colours of the final reproduction match the originals as closely as possible, with the exception of red, found in the *Uppsala Notebook* (plates XXXIII, 59 and XXXIV). Throughout, our goal has been to produce plates faithful to the originals, with the least sacrifice of their beauty, harmony and legibility.

The preparation of Volume IV of Nicholas Copernicus' Complete Works has lasted many years, and involved the labours and aspirations of many persons. Acknowledgements are due, first, to those libraries and archives, in many countries, that have made their collections accessible for research, and granted permission to reproduce Copernican sources in the present volume. In particular Professor Heribert Nobis from Munich should be mentioned here with gratitude for providing genuine photographs from Hans Schmauch's collection for reproduction. Next, thanks should be expressed to numerous photographers, who prepared prints, which served as the basis of the facsimiles. Their names, as well as the list of the respective libraries and archives, follow the List of Plates in the present volume.

Acknowledgements are due to staff members of the Centre for Copernican Studies: Małgorzata Golińska-Gierych, who took care of the work from its very beginning till 1986, Jacek Soszyński, who continued and completed her work, and Marek Troszyński, who typed the introductory parts of the separate language versions. Particular thanks are due to Mrs Ewa Krasińska for reading the English version, and to Professor John D. North for its final revision.

#### INTRODUCTION

Also, acknowledgements are due to the members of the staffs of the National Press (Drukarnia Narodowa) in Cracow, and of the Polish Scientific Publishers in Warsaw and Cracow. Władysław Trojanowski prepared the scanner technology for producing the facsimiles, while Barbara Baran worked on retouching the photographs, together with Maria Kaniowa from the Polish Scientific Publishers in Cracow, who, moreover, edited the volume. Mrs. Maria Bujnowska from the Warsaw branch of the Polish Scientific Publishers and Władysław Negrey, director of its Cracow branch supervised the whole work.

Thus, after twenty years, Volume IV concludes the English version of Nicholas Copernicus Complete Works.

London, British Library.

## Letters of the Varmia Chapter written by Nicholas Copernicus

Letters contained on Plates XXI-XXXI are not published in the English version of Vol. III of Complete Works. In other versions they are numbered 18-28.

Plate XX. 34. Seal of the Varmia Chapter with the Madonna and Child, enlarged × 2. Letter of the Varmia Chapter to the City Council of Gdańsk. Frombork, 24 June 1524.

Gdańsk, State Archives, 300 D. 42, no. 304.

Plate XXI. 35-36. Letter 18. Varmia Chapter to Fabian of Lossainen, bishop of Varmia. Olsztyn, 7 March 1520.

Cracow, Czartoryski Library, MS 1594, pp. 585–586.  $23 \times 19$  cm.

Plate XXII. 37-38. Letter 19. Varmia Chapter to Bishop Fabian of Lossainen. Olsztyn, 29 April 1520.

Cracow, Czartoryski Library, MS 1594, pp. 593–594. 28  $\times$  21 cm.

Plate XXIII. 39-40. Letter 20. Varmia Chapter to Bishop Fabian of Lossainen. Olsztyn, 14 June 1520.

Cracow, Czartoryski Library, MS 1594, pp. 605–606.  $21 \times 20.5$  cm.

Plate XXIV. 41-42. Letter 21. Varmia Chapter to Bishop Fabian of Lossainen. Olsztyn, 11 September 1520.

Cracow, Czartoryski Library, MS 1594, pp. 639-640. 29 × 21 cm.

Plate XXV. 43-44. Letter 22. Varmia Chapter to King Sigismund I of Poland. Olsztyn, 16 November 1520.

Berlin, Geheimes Staatsarchiv Preussischer Kulturbesitz, XX. HA StA Königsberg, OBA 24345. 28·5 × 21 cm.

Plate XXVI. 45-46. Letter 23. Henry Perigh, military commander in Olsztyn, to Bishop Fabian of Lossainen. Olsztyn, 22 December 1520.

Cracow, Czartoryski Library, MS 1594, pp. 725–726.  $14 \times 20$  cm.

Plate XXVII. 47-48. Letter 24. Varmia Chapter to Paul Płotowski, provost of Varmia (draft). Frombork, after 8 November 1523.

Olsztyn, Diocesan Archives, Vol. D. 122, f. 1<sup>r-v</sup> 28 × 19 cm.

Plate XXVIII. 49-50. Letter 25. Varmia Chapter to Bishop Maurice Ferber. Frombork, 23 March 1524.

Olsztyn, Diocesan Archives, Vol. D. 122, f.  $7^{r-v}$  25 × 18·5 cm.

Plate XXIX. 51-52. Letter 26. Varmia Chapter to Bishop Maurice Ferber. Frombork, 14 May 1524.

Olsztyn, Diocesan Archives, Vol. D. 122, f.  $8^{r-v}$  27.5 × 18.5 cm.

Plate XXX. 53-54. Letter 27. Varmia Chapter to Bishop Maurice Ferber. Frombork, 6 June 1524.

Olsztyn, Diocesan Archives, Vol. D. 66, f.  $80^{\text{r-v}}$  28 × 20.5 cm.

Plate XXXI. 55-56. Letter 28. Varmia Chapter to Bishop Joannes Dantiscus. Frombork, 17 March 1539.

Cracow, Czartoryski Library, MS 1595, pp. 997–998.  $28.5 \times 20$  cm.

Astronomical tables and medical prescriptions written in books owned and used by Nicholas Copernicus

Plate XXXII. 57. Johannes Crastonus, Dictionarium Graecum cum interpretatione Latina, Modena, 1499–1500. Flyleaf α with Copernicus' ownership signature inscribed in Greek characters.

Uppsala, Library of the University, Copernicana 5.

 $31.5 \times 21$  cm.

This Plate is referred to in Vol. III of Complete Works (p. 5, note 4) as Plate XXXIV.

Plate XXXIII. Astronomical tables and notes in: Alfonsus X, Tabulae astronomicae, Venice, 1492; Johannes Regiomontanus, Tabulae directionum et profectionum, Augsburg, 1490, bound in a single volume together with a handwritten quire of sixteen folios called the Uppsala Notebook.

Uppsala, Library of the University, Copernicana 4.

22 × 16.5 cm.

The astronomical tables and notes from Uppsala, Library of the University, Copernicana 4 (Plates XXXIII and XXXIV) are not published in the English version of Vol. III of Complete Works.

- 58. Front page with Copernicus' ownership signature, f. 1<sup>r</sup>.
- 59. The Sun and the Moon. A table of parallax for 51°, f. 113v.
- 60. A table of sines for R = 60, f.  $136^{r}$ .
- 61. Note concerning Regiomontanus' table of declinations, f. 142v.
- 62. A table of secants inscribed in Regiomontanus' table of tangents, f. 143<sup>r</sup>.
- 63. Note concerning the table by Regiomontanus, f. 155v.

#### Plate XXXIV. The Uppsala Notebook.

- 64. A table of the motion of the Moon, f. 270r.
- 65. Page prepared for inscribing a table, f. 270v.
- 66. A table of mean conjunction and opposition of the Sun and the Moon. A table of revolutions, f. 271<sup>r</sup>.
- 67. Two tables concerning the motion of the Moon, f. 271v.
- 68. A part of Peurbach's solar apogee table, f. 272r.
- 69. A table of equations of the Sun, f. 275v.
- 70. A table of equations of the Sun, continued, f. 276<sup>r</sup>.

#### Tables of the latitudes of the five planets with a canon

- 71. Saturn, f. 276v.
- 72. Jupiter, f. 277<sup>r</sup>.
- 73. Mars, f. 277v.
- 74. Venus, f. 278r.
- 75. Mercury, f. 278v.
- 76. Tables of deviation and declination for Venus and Mercury, f. 279r.
- 77. A table of proportional minutes for the five planets, f. 279v.
- 78. A table of proportional minutes for the reflection of Mercury, f. 280<sup>r</sup>.
- 79-80. A canon concerning the tables of latitudes of Venus and Mercury, ff. 280v-281r.
- 81. Blank page, f. 281v.
- 82. Apogees of the four planets, f. 284r.

- 83. A note concerning the theory of the solar system, f. 284v.
- 84. A table concerning eclipses, and an auxiliary multiplication table, f. 285<sup>r</sup>.
- 85. Astronomical notes, f. 285v.
- Plate XXXV. 86. Recommendation of the imperial pills, attributed to Arnold of Villanova. Matthaeus Silvaticus, Liber pandectarum medicinae, Venice, 1498, f. 182v.

Uppsala, Library of the University, Copernicana 14.  $30.5 \times 21$  cm.

- Plate XXXVI. Nicholas Copernicus' prescriptions.
  - 87. Copernicus' prescription for pills for the stomach, 24 February 1532, written by an unknown hand. Mesue, *Opus medicinale cum expositione Mondini super canones universales*, Venice, 1502, end paper of front cover.

    Uppsala, Library of the University, Copernicana 23.

    29.5 × 21.5 cm.
  - 88–91. Copernicus' prescriptions in: Bartholomeus Montagnana, Consilia (etc.), Venice, 1514, ff. 345°, 346°, 349° and 406°.

Uppsala, Library of the University, 42:52 (Obr).

31 × 22 cm.

The prescriptions from B. Montagnana's Consilia are not published in the English version.

#### Copernicus' administrative documents

- Plate XXXVII. 92. Copernicus' proxy concerning his scholastry. Padua, 10 January 1503. Copernicus' draft with annotations by the notary public.

  Padua, Archivio di Stato, Archivio Notarile, Stefano Venturato's files, vol. I, f. 175<sup>r</sup>.

  29 × 22 cm.
- Plate XXXVIII. Leases of Abandoned Farmsteads, reduced (scale 0.8).
  - 93-104. Leases in the district of Olsztyn for 1516-1519, and the first page of leases in the district of Melsac for 1517, written by Copernicus. Original lost; before 1945: Diocesan Archives Frauenburg, Schbl. II, 55.

Munich, Deutsche Copernicus-Forschungsstelle, photographs from Hans Schmauch's collection.

105-106. Leases in the district of Melsac for 1517-1519, continued, written by Copernicus.

Olsztyn, Diocesan Archives, Dok. Kap. II, 55, f.  $42^{r-v}$ .  $32 \times 10.5$  cm.

107. Copernicus' leases in the district of Olsztyn for 1521, written by Tiedemann Giese

Olsztyn, Diocesan Archives, Dok. Kap. L 92, p. 1.  $32 \times 11$  cm.

Plate XXXIX. 108-118. Inventory of the Documents and Legal Papers in the Treasury of the Castle in Olsztyn 1520 A.D., written by Copernicus.

Olsztyn, Diocesan Archives, Dok. Kap. Y 9, ff. 1-7. 29.5 × 11 cm.

Plate XL. 119–125. Accounts of the Guardians of the Varmia Chapter, 1531. Document II written by Copernicus, reduced (scale 0·8). The bottom edges of pp. 3<sup>v</sup>–6<sup>r</sup> cut on photographs by 1–2 cm.

Berlin, Geheimes Staatsarchiv Preussischer Kulturbesitz, XX. HA StA Königsberg, Etatsministerium, 31q, 1, ff 3<sup>v</sup>-6<sup>v</sup>.

35 × 11 cm.

This Plate is referred to in Vol. III of Complete Works, p. 294, n. 14, as Plate XLII.

Plate XLI. 126. Copernicus' approval of a financial transaction. Olsztyn, 15 March 1518. Written by a scribe.

Olsztyn, Diocesan Archives, Z. 2(1).

16.5 × 24.5 cm.

This Plate is referred to in Vol. III of Complete Works, p. 254, as Plate XLIII.

Plate XLII. 127-128. Letter IV. Nicholas Copernicus' autograph letter to Canon Felix Reich. Frombork, 28 April 1527 according to E. Rosen, or 19 April 1528 according to M. Biskup. Original lost; before 1945: State Archives Königsberg, Schrank 5, Fach 22, no. 28.

Munich, Deutsche Copernicus-Forschungsstelle, photographs from Hans Schmauch's collection. This Plate is referred to in Vol. III of Complete Works p. 319, as Plate XLV.

Plate XLIII. Bread Tariff, 1531.

129. Olsztyn Bread Tariff according to the prices of the grains, wheat and rye, f. 62<sup>v</sup> (p. 2), written by Copernicus.
Uppsala, Library of the University, H. 156.
28 × 19.5 cm.

130. Investigating the computations connected with the ordinary top quality light bread, f. 66 (p. 9), written by Felix Reich.
Uppsala, Library of the University, H. 156.
28 × 17.5 cm.

#### Copies of Nicholas Copernicus' writings about money

Capital letters in brackets refer to capitals used in Vol. III of Complete Works to denote successive versions of Copernicus' writings about money, and separate manuscripts of his Commentariolus and Letter against Werner.

Meditata (private reflections), 15 August 1517 (M)

Plate XLIV. 131-132. Copy made after 5 April 1521, now lost; before 1945: Danzig, State Archives, 300, 25, no. 20.

Munich, Deutsche Copernicus-Forschungsstelle, photographs from Hans Schmauch's collection.

Plate XLV. 133-139. Contemporary copy.

Warsaw, Central Archives of Historical Records, Libri legationum 5, ff.  $170^{v}$ – $173^{v}$ .  $29.5 \times 19$  cm.

Plate XLVI. 140-145. Contemporary copy.

Wrocław, Ossolineum Library, Górski's Files, MS 199, pp. 264-269. 30·5 × 20·5 cm.

Plate XLVII. 146. First page of 18th century copy.

Gdańsk, State Archives, 300 R/D 6, p. 179.  $33.5 \times 21$  cm.

Denkschrift, 1519 (D)

Plate XLVIII. 147–155. Copy dated 1522 with Appendix (A) on fol. 546<sup>r</sup>–546<sup>v</sup>. Gdańsk, State Archives, 300, 29/6, ff. 542<sup>v</sup>–546<sup>v</sup>. 29·5 × 22 cm.

Plate XLIX. 156-160. Text printed in: Caspar Schütz, Historia rerum prussicarum, Zerbst, 1592, ff. 517-519.

Cracow, Czartoryski Library, 6 III Cim. 31·5 × 20·5 cm.

Plate L. 161-163. Latin translation-summary (T) of the *Denkschrift*. End of the 16<sup>th</sup> century.

Toruń, State Archives, Kat. II-VII 4, pp. 334-336.

 $32.5 \times 20$  cm.

Text T is not published in the English version of Complete Works.

Essay on the Coinage of Money (E), April 1525 - April 1526, with the German text of the proclamation issued from Malbork on 6 November 1418, and a Latin note In libro actorum antiquo.

This last note is not published in the English version.

Plate LI. 164–175. Copy written by Felix Reich (ER). Note *In libro actorum antiquo* — f. 1°, proclamation issued from Malbork — f. 6°.

Berlin, Geheimes Staatsarchiv Preussischer Kulturbesitz, XX. HA StA Königsberg, HBA, H, Kasten 752, ff. 1<sup>r</sup>–6<sup>v</sup>.

32 × 22 cm.

Plate LII. 176–194. Copy which belonged to Friedrich Fischer, chancellor to Duke Albert of Prussia (EF). Proclamation issued from Malbork — ff. 48<sup>r</sup>–49<sup>r</sup>, note In libro actorum antiquo — ff. 49<sup>v</sup>–50<sup>r</sup>.

Berlin, Geheimes Staatsarchiv Preussischer Kulturbesitz, XX. HA StA Königsberg, Ostpreussische Folianten, no. 12868, ff. 41–50. (ff. 38–47 of new foliation).  $28.5 \times 21.5$ .

Plate LIII. 195–207. The Lidzbark copy which belonged to Bishop Maurice Ferber (EC). Proclamation issued from Malbork — f. 91<sup>r-v</sup>.

Cracow, Czartoryski Library, MS 259, ff. 85v–91v.  $30 \times 20.5$  cm.

Copies of Nicholas Copernicus' minor astronomical writings

Copernicus' Commentariolus, before 1514

Plate LIV. 208–217. Duncan Liddel's copy, dated 2 November 1585, written on six folios interleaved in his copy of the *Revolutions*, Basel, 1566 (A).

Aberdeen, University Library, King's College, 521 Cop. 2<sup>2</sup>, ff. H.<sup>r-v</sup>, 85bis<sup>r-v</sup>, 100bis<sup>r</sup>, 148bis<sup>r-v</sup>, 160bis<sup>v</sup>, 168cor<sup>r-v</sup>

160bis<sup>v</sup>, 168ter<sup>r-v</sup>. 30 × 20 cm.

Plate LV. 218-233. Copy sewn in the binding of Johannes Hevelius' copy of the Revolutions, Basel, 1566 (S).

Stockholm, Library of the Royal Academy of Sciences, pp. 1–16 (no call number).  $29\ \times\ 19{\cdot}5$  cm.

Plate LVI. 234–252. Christian Sørensen Longberg's (Longomontanus') copy made after 1589 (V).

Vienna, Österreichische Nationalbibliothek, Handschriften- und Inkunabelsammlung, Cod. 10530, ff. 34-43.

22 × 16 cm.

Copernicus' Letter against Werner (Letter III, Nicholas Copernicus to Bernard Wapowski, Frombork, 3 June 1524)

Plate LVII. 253-254. Excerpt, printed in: Tychonis Brahe Dani de mundi aetherei recentioribus phaenomenis, Uraniburgi, 1588, pp. 362-363.

Warsaw, National Library, XVI QU 5020 adl. 23 × 17 cm.

Plate LVIII. 255-264. Henry Savile's copy, 1578 (Ox).

Oxford, Bodleian Library, MS Savile 47, ff. 28-32v.

22  $\times$  16 cm (f. 28), 18·5  $\times$  14·5 cm (f. 29–31), 19·5  $\times$  14·5 cm (f. 32).

Plate LIX. 265–266. Thomas Smith's copy, 17th century. Oxford, Bodleian Library, MS Smith 93, ff. 173 and 180°.

21 × 15 cm.

Plate LX. 267-268. Stephen Rigaud's copy, dated November 1823. Oxford, Bodleian Library, MS Rigaud 43, ff 59 and 73. 22.5 × 14 cm.

Plate LXI. 269-286. Copy dated 30 March 1575 (V).

Vienna, Österreichische Nationalbibliothek, Handschriften- und Inkunabelsammlung, Cod. 973726 ff. 1-9°.

20 × 16 cm.

Plate LXII. 287-296. Johann Praetorius' copy, 1569 (Sch). Schweinfurt, City Archives, MS 1 Ha 14, ff. 9-13<sup>v</sup>. 21 × 17 cm.

Plate LXIII. 297-301. Copy made after 1571 (B).

Berlin, Staatsbibliothek, Preussischer Kulturbesitz, Cod. Lat. Fol. 83, ff. 8-10.

 $29.5 \times 20$  cm.

Plate LXIV. 302-307. Copy written on the front (303/304) and rear (305/306) flyleaves and on the rear end paper (307) of the binding of the volume containing Copernicus' *Revolutions*, Basel, 1566, and Regiomontanus' *Epitome*, Nuremberg, 1550; 302 — front end paper.

Uppsala, Astronomical Observatory, Hjörther Collection, H. III. 34.  $30 \times 21$  cm.

Plate LXV. 308. Copy of the Strasbourg manuscript which was written in Prague in January 1531, and destroyed when the Strasbourg library was burned down in 1870 during the Franco-Prussian War. This copy was made by Leonard Niedzwiedzki before 1875, from an earlier copy prepared by Antoni Makowski at Strasbourg in June 1839 (Mk). Polish translation inserted between the lines of the Latin text.

Cracow, Jagiellonian Library, MS 482/73, first page.  $20.5 \times 13.5$  cm.

Plate LXVI. 309-321. Copy of Antoni Makowski's copy (Mk) of the Strasbourg manuscript. This copy was made in 1899 at the Academy of Arts and Sciences in Cracow and offered to the Strasbourg Municipal Library.

Strasbourg, Municipal Library, MS 1045, ff. 2-8.

#### Works printed in Nicholas Copernicus' lifetime

Plate LXVII. Theophilacti scolastici Simocati epistole morales, rurales et amatorie interpretatione Latina, Cracouie, 1509.

Cracow, Jagiellonian Library, Cim. 4092.

20 × 14.5 cm.

322. Front page.

323-326. Laurentius Corvinus' Poem.

327. Letter of Nicholas Copernicus to Lucas, Bishop of Varmia.

- 328-361. Theophylactus Simocatta, the Moralist, Ethical, Rustic, and Love Letters in Latin Translation.
- Plate LXVIII. De lateribus et angulis triangulorum (...) libellus (...) scriptus a clarissimo et doctissimo uiro D. Nicolao Copernico Toronensi, Vittembergae, 1542.

Cracow, Jagiellonian Library, Cim 5443.

21 × 16 cm.

362. Front page.

363. Epigram ascribed to Joannes Dantiscus or to George Joachim Rheticus.

364-399. Appendix containing a table of sines: Additus est canon semissium subtensarum rectarum linearum in circulo.

This work is not published in the English version of Vol. III of Complete Works.

melnemen. morge frederigt der wyster gim

Hohmeister nochmehr verringert worden / Ind ward sonderlich erwogen die groffe theivrung des filbers/ond wo man eine neive Shange fchlagen folte/ wolte die noth erfordern zum erften und im angriff eine treffliche fumme von Git ber zubestellen / darzu man iso gefüglich nicht kommen kundte / darumb das Die Jugger und andere Geselschafften / Die mit dem Konige zu Portugal un kauff der Burge vbereinkommen / hetten allenthalb in allen ortern das Silber befeblagen/ angefeben/das derfelbe Ronig alleine mit lauterm ond barem filber ond fonft mit keiner andern Rauffmanschaffe, wolte bezalet sein. Nun geschahen von bender feits herrn Rabten allerlen vorschlege / fo wot auff einem newen Grad/als auff den alten ju mungen / mit picien bewegnissen / welcher weg der nützefte were / auch dabin geftalt / das man Königlicher Maiefiet Lans De/als nemlich die gange Grone/das groffe Fürstenthumb zu Littawen/ond viefe Lande Preuffen auffeine einerechtige Munte fiellen fundte/ Dennoch ift in allem diefem handel/durch viele Difputationen ond verlauff der zeit für bismat nichts endlichs beschloffen / alleine das man für einen Grund in diesem handet feten mufte / das im schlagen folder Munte / focs anders diesein Lande ju wolfart und wachsthumb gedeien folte / fein gewinft vberall gefucht werden mufre.

Ben diesen raheschlägen hat der Gesandte des Capittels von Ermland/
Herr Nicolaus Copernicus einen aussatz gemacht / vond den Herren Rahten von der getegeben/Welchen/dieweil daraus die gelegenheit der alten Preustischen Munike von der zuersehen / ift nicht vandeig / allhier mit einzuziehen / von lautet von wortzu Muniks

wart / als folget/

Minisc wird genant gezeichnet Gold oder Siber / damit die geltung der kaufflichen oder verkaufflichen gezalet wird / nach einfatung emer jeglichen Gemeine / oder destelben Regierer. Hieraus ist zuverwerden / das eine mas ist der wardirung / Nun ist von noten / das eine mas habe einen festen vind bestendigen stand Dann wo das nicht gehalten wird / folget notwendig / das die Ordnunge eines gemeinen nutzes verrücket / auch die Reuffer vind Verkeuffer mannichfaltig betrogen werden / als wo die Ele/der Scheffel / oder Gewichte nicht einen gewissen stand behielte / Dieser gestalt wird verstanden eine Masse der achtung und wardierung der Müntze / Ind wiewol dieselbe achtung der Müntze sich gründet in die güte der Matterien / das man nennet das Korn oder Gran / ist doch von noten einen unterscheid zu mercken der wirde und der achtunge/Dann eine Müntze mag größer geachtet werden/dann die Mates ri/darinnen sie ist/ und also widerumb.

Hierneben ist zu mereken die vrsache der Müntzen einsatzung/ welche von nöten gewesen / Dann wiewol ein seglich ding mochte gewechsele werden / an Gold und Gilber / alleine nach der Gewichte / nach dem aus gemeiner verwilligung der Menschen das Gold und Silber allemhalb thewrbargerechnet / Doch dieweil es gantz unbequem gesunden / die Gewicht alleawege ben sich zu haben / und dann auch die lauterheit des Gilbers und Goldes zuerken.

juerkennen / ist von den Menschen für das best angesehen und auffgeset/das eme Müntze mit einem gemeinen zeichen solte geschlagen werden / aus welchem zeichen kündig solte sein/das die Müntze rechtsertige theile smen habe/des Goldes oder Gilbers/vnd die stathasstigkeit des zeichens das vertrawen besestige. Run ist zu wissen / das die rechtsertige vnd gleichmessige achtung der Müntzen ist/wann sie gar wenig minder Goldes oder Gilbers in sich hat / dann mit der selbigen möchte gekausse werden/ als nemsich so viel do wemger / als für den kosten vnd lohn der Müntzen von noten abezuziehen / dann das zeichen sol der Materien auch etwas wirde zusügen. Diese achtung der Müntzensprag drenzerten weise verruckt werden/Zum ersten im Gran/so allein die Materie seil hat/als nemsich/wann in gebürlicher wicht der Müntzedem Gilber zu viel Erzzugesetztig ist. Zum andern/ so die Gewicht scheel hat / wiewol der zusatz oder granzechtestig ist. Zum dritten/ welchs das ergeste ist/ so die benden seil beneinander sind.

Es fan auch die Mange in verachtung fommen/aus der felben vnmeffigen vielheit / wo zu viel Gilbers vermunget wird / das das robe Gilber von den Leuten mehr denn gewönlich begeret wird / dann dadurch nimpt abe die achtung der Mange/wann ich mit der selben nicht so viel Gilbers kan kauffen / als sie in fich sethet bat / vnd befinde als dann einen groffern muts / das ich die Munice schmelte und tilge. Hierentgegen ift noth / das man nicht mehr Munte schlage/ bis folange fle fich mit der wirde des filbers vergleiche. Quad wird die Munise won the felbst unwert / so sie aus langem gebrauch vernützet ist. Des zeichen ist fo in der Munte etlicher maffen mercklich weniger Gilber befunden wird/dann für dieselbige gekaufft wird/Das zu wandeln/fol die Münke vermacht und vernewert werden. Wo man nun newe Munke machen wil / die alldo gank zuuer bicten/vind das man in dem Skuntsbaufe für die alte Skuntse newe gebe / denen die sie hinein bringen/ond das nicht nach voriger achtung der alten Munise/son dernnach der Wirde des Gilbers / das in je befunden / Und tvo das nicht gefcbicht/wird die alte vergifften die Achtbarkeit der newen Münken / zweierlen vesachen / Denn wo sie mit der newen vermischet / wird der geburlichen Ges wicht in der fummen abgebrochen/vnd wo dam auch die Manke in der vielheit du sehr zunimmet / wird folgen was zuwordin ist gesaget. Wher alles erfindet fich der gröfte gebrech / vnd ein vnleidlicher Irrehumb / wo der Landesherr oder Die Regenten der Lande/oder die Gemeinden einen gewin fuchen aus der Sylung sung / als nemlich/wann sie der vorigen und gangbaren Munisc / eine newe Mante zu geben/die im Gran oder im Schrot vnuolkommen ift / vnd doch in ber achtung mit der vorigen verglichen wird. Dann folder betreuget nicht als Icin die Bnterthanen/besondern auch sich selbst/in deme das er sich fresvet eines Reletieben muses / der gumal gering und gar flein ift / nicht anders denn ein far ger Ackerman / der bofen Samen feet / Damit er den guten erspare / do wird des bosentviderumb mehr / dann das er ausgesect hat. Dis aber verwüstet die wirs biakeit der Muntsc gleich wie rate / oder ander onkraut das Getreide / welthes fo es oberhand nummer/ond ju fpate wird befunden/mag es der Herr nicht Liederlichen buffen oder abwenden / ohneine andere beschwerunge der Unterthamen/auch nicht ohne seinen vinglumpff / dieweil er dasselbig geursachet. wollen wir zu mehrerm verstendnis ein anzeigung und Exempel geben von onfer

onfer Preuflischen Munke / Die bishero mit fast vielen Gebrechen ift wandels bar worden/diefelbe Mange ift genge onter diefen Namen/als Marche / Stoter / vnd unter demfelben namen wird auch die Gewicht gebraucht / Eine Marce lotigs macht ein halb Pfund / vnd dren Setote machen eine Bnize / Aber die Marcf an der gabl wird gerechnet auff sechtig Schilling in der Munte / So wird die Preuffische Munge gebraucht in Schillingen/Grofchen und Sellern/ Es erfindet sich aber/das/die nun Groschen genennet werden / vormals sinds Schillinge gewesen / vnd berfelben acht Marc haben inne gehabe ein Pfund fein silber das sind zwo Marcklotigs / welche sich auch aus ihrer Materieer. findet/Dannihr Gran ift aus der helffte Gilber und Rupffer / und dieselbigen acht Marck zu sechtig Schillingen in der zal/wegen viel nach zwen Pfund / die find geheissen worden newe Schilling / vnd ihre Marck find genenuet newe oder gute March/Dann dancben find gewesen andere alte Schillinge / ond derfelben Marche/alte oder geringe Marche/diefe find an der wichte mit den nema en eintrechtig gewesen/aber nach ber gute vnierschieden auff die helffte / bas ift balb fo viel wert / dann ihr zu fat ift gewefen allein nach dem vierden theil Gils ber wind derer fechischen March / Die vier Pfund gewogen haben inne gehalten ein Pfund fem filber/das find zwo March lotiges.

Darnach in verwandelung des juftandes biefer Lande, als den Stabten Jugelaffen Situnge gufchlagen/vnd fie ihrem newen Privilegio folge theten/hat das Geld Bugenommen an der vielheit / nicht aber an der gute / Dann do hat man angefangen / dem funffeen theile filber / vier theil Rupffer gufat jugeben/ bis fo lange die Snarck lotigs für geben Marck / vnd ein Pfund fein filber für Brankig Marck ift verkaufft worden. Nach dem aber neben der newen Munke auch die alte eins theils ist gegangen / hat sichs erfolget / bas die vorige newe Schillinge sind Stoter geworden/ so/ das vier und zwenkig auff eine germge Marck sind gerechnet / dann eine Marck der gemeinen neiven gemuntzeten Schillinge in der zal fechtig/ift niche viel beffer gewesen/dann die vier und zwen-Big Stoter / Darnach aber do diefelben Stoter auch verfchivunden / barumb das sie nach ihrer achtung queb in Pommern ond in der Marck angeneme ond gangbar waren / hat man für gut angesehen / sie widerumb ms Land zuziehen/ durch eine fatzung und erhöhung auff einen Grofchen / das find dren Schillins ge / welchs ein groffer jethumb gewesen / vnd nicht fast rhumlich solch einem trefflichen Rabte / gleich ob fie fich ihres eigenen vbels hetten gefrewet / vnb Dreuffennicht hette magen fein ohne die Grofchen / fo fie doch nicht beffer waren dann funffsehen Heller / vnd ohne dieselben sonft vberfluffig genug Munke in Preuffen war. Demnach find die Grofchen ungleich gewesen den dreien Schil lingen an der gute im fünffeen oder fechften teil/Go fie aber der jerigen fatunge nach/ gleich wert geachtet find/ haben fie ernidert die wirdigfeit der Schillinges bud die gebreuchliche achtung des vermischten Geldes mit der gute verworren. Derhalben hat von tage ju tage die achtung des Geldes mehr vit mehr abgenoa wen/vnd dannoch hat man von dem munten nicht wollen abstellen/vnd do es die butoften nicht wolce austragen / das man eine gleichwirdige Munge/ mit ber vorigen hette fiblagen mugen / ift fie für vnb für geringert worden / alfo bas fie

auch der abfieigenden achtung nicht genugfam. Darumb do die lette Situnge allewege der vorigen an der gute vngemes geworden / hat auch die lette feetlich die vorige achtung zustöret und ausgedrungen / bis so lange die achtung der Schillinge mit der gute der Groschen sich hat vergleichet / und bas nu gwelff Marck geringe für eine Marck / vnd vier vnd zwankig Marck für ein Pfund filbers werden gegolten/Dennoch ift fein auffhoren / wiewol fich die Schillin ge mit den Groschen nach der achtung vergleichen/fo folgen nu noch newe Gro fchen / Die zum wenigsten am Schrot fehl haben / denn derfelbigen feche und Awantsig Marck in der Gewicht zwen pfund / haben ein pfund filber / QBas ift nun anders zugewarten / dann das man im furgen ein pfund silber für sechs pnd zwankig Marcf / vnd die Marcf lotigs für drenzehen Marcf wird muf fen gelten/woes nicht vorfommen wird/Alfo trefflichem gebrech ift unterworf. fen die Preufische Munte/vn dadurch das gante Land/Allein die Goldschmie de nemen genies aus des Landes schaden und abbruch/so die gute des Geldes au fich bringen. Denn aus dem hauffen verlefen fie die alte Munge/daraus fit das Silber scheiden und verkauffen / und nemen stets widerumb in anderer Mante mehr filbers vom vnuerftendigem Volcke/ Godann folche alte Schil Imge gants ontergangen/lefen fie aus die denen neheft fein / gleich wie den Wei Ben aus dem Drefpen. Es erfordert die noth / das diefe gebrechen reformiret werden/ in zeiten/ ehe dafi ein groffer fall geschicht/das zum wenigsten ein pfund Silber auff zwenkig March / vnd die March lotigs auff zehen March ge bracht/vnd dasselbige bestendiglich gehalten würde / nach obangezeigter weise. Nu wollen wir ein Erempel anzeigen / wie folche Reformation gefchehen moch te. Zum ersten/das nur eine stelle zu manken werde angesetzet / do die Manke nicht im Namen einer Stad / oder auffihr Geprege / fondern des gangen Lan des wurde geschlagen/ond das weiter ohne gemeinen raht und zulas Land und Stadtefeine newe Minke wurde auffgerichtet / das auch durch ein bestendig Decret verwahret wurde/das aus einem Pfunde feines filbers/nicht mehr dan zwenkig Marcf wurden geschlagen/ in folgender weise/Zu den Schillingen sol man nemen drep pfund Rupffer / vnd ein pfund sein Silber / weniger eine hal be Bnke / oder fo viel es von noten were / den fosten der Munker alleine abzu ziehen / Die schmeltze man in einen Klos / vnd man schrote daraus zwentzig SNarck Schillinge/ welche im kauffe werden einbringen ein pfund Silbers/Das Dargu möchte man auch schlagen Stoter von groth ist amo March lotias. pfund Rupffer / vnd ein pfund/weniger ein halbe Binge filbers / für zwentzig Marck/ je vier und zwantzig für die Marck geschrotet. Auch möchten für dit Schillinge halbe Schillinge gemüntzet werden nach voriger Rechnung / 00 rer fünffe für ein Schott giengen / vnd einer für dren der jezigen Heller gewech' felt wurde. Goaber der Muntzschlag angefangen wurde/ mufte der gebraud der alten Müntze gantz verboten und nidergelegt werden / und das man im Mantshaufe/für drenzehen March des alten Geldes/zalezehen March der new en Schilling oder Stoter. Diesen schaden muste man einmal tragen / Da mit ein groffer frommen und bestendiger nutz zuwüchse / und es solte gnugsant fein/das die Munke in funff und zwankig oder mehr Zahren einmal vernew ert wurde. Die sen von der Mungezu einer berahmung gesaget / welche einen icden basverstendigen zutadeln oder zubestern sol onterworffen sein. 58

Es ward auch in diesem rabischlage fürgenommen und ermogen/wie man mochte die Preuffische Munke mit der jitgengigen Polnisch- gleichung en Munke vergleichen/welche man erachtete in solcher weise geschehen kundte/ der Preus das geschlagentourden sechtig newe Schillinge für eine March/die an der gute fifchen und vud achtung gleichmessig weren zwankig Polnischen Groschen so möchte man Munge. auch machen andere Heller / beffere denn die ihigen / derer fechs einen newen Schilling in der Wirden ausbrechten und gulten. Nach folder erchnung warde ein Polnischer Grosche gelten bren Preussische Schilling / vnd ein halber Polnifcher Grofche neun Preuffische heller/vnd also weren die Preuffischen vud Polnischen Beller in der achtung gleich/ond immassen die Bigerischen Galben du acht und dreiffig Brofchen in Polen verweichfelt werden, fo auch in Prenfien nach ihren Groschen/Das feind givo March weniger fechs Schilling. Aus folthem fürnemen mochte vieleicht ber vergleichung ber Munke fond auch ben Landen Preiffen geraften werden. Aber diefer handel hat noch etliche Jahr bernach gewehret / ehe bann man zu folcher verglendung hat komen konnen.

In diesem Jare ist die Stad Danzig nebenst andern mittier wanten mit Christierno Könige zu Dennemarcken in öffentlichen Krieg vond Dennes femoliche handelung geraften / von welchen dingen defto grundlicher zu reden/ marcken. ond wie es sich ersten angesponnen/auch was für ein zustand damain und erliche Jahr zuworn allhier in der Nachbarfchafft gewesen/ift es notig/diese Beschith-Nachdem König Johannes / Der viel Jar vind ten etwas weiter abzüholen: bis an fein ende mit den Schweden Rrieg/emporung und allerlen widerwertige keit gehabt/mit Tobe abgangen / vind fein Son Chriftiernus an feine stelle gewehlet deme die Schweden nicht gehorfamen wollen / vneerfrunde fich Ronig Chriftiem Spriftiernus die widerspenstigen zum gehorsam zubringen / Derwegen er sich 3mg auff berwichenen 1518. Zahresmit Decrestraffe zu Baffer und Lande gerüftet/ bud an Bolde ben zwantig tatifent Man zuwege gebracht / damit er Schtpe denreich oberzogen/ mit Raub/Brant vid Schwert verheeret den Thumbau Ipfal geplundert/darnach Stad vid Schlof Stockholm belagert/ bind daffin feche Monat gelegen/Die Schwebenthaten im gleichwol folchen widerfrande das er mit gewalt an der Beftung nichts hat schaffen tonnen/sondern viel mehr in folche gefahr bende hungers und widerstandes gerhaten / das er sich endlich der unterlage befahren mufte/ Derwegen er fein Bolet wider gu Schiff fürete/ in willens von Bannen weggufigeln/vnd befferer gelegenheit gimerwarten/ Aber der Wind/welcher domain/wie man schreibet / ganger vier Monat lang/ aus einem orte wehete/war ihm fo gar entgegen/ das er nirgends hin forien kundte.

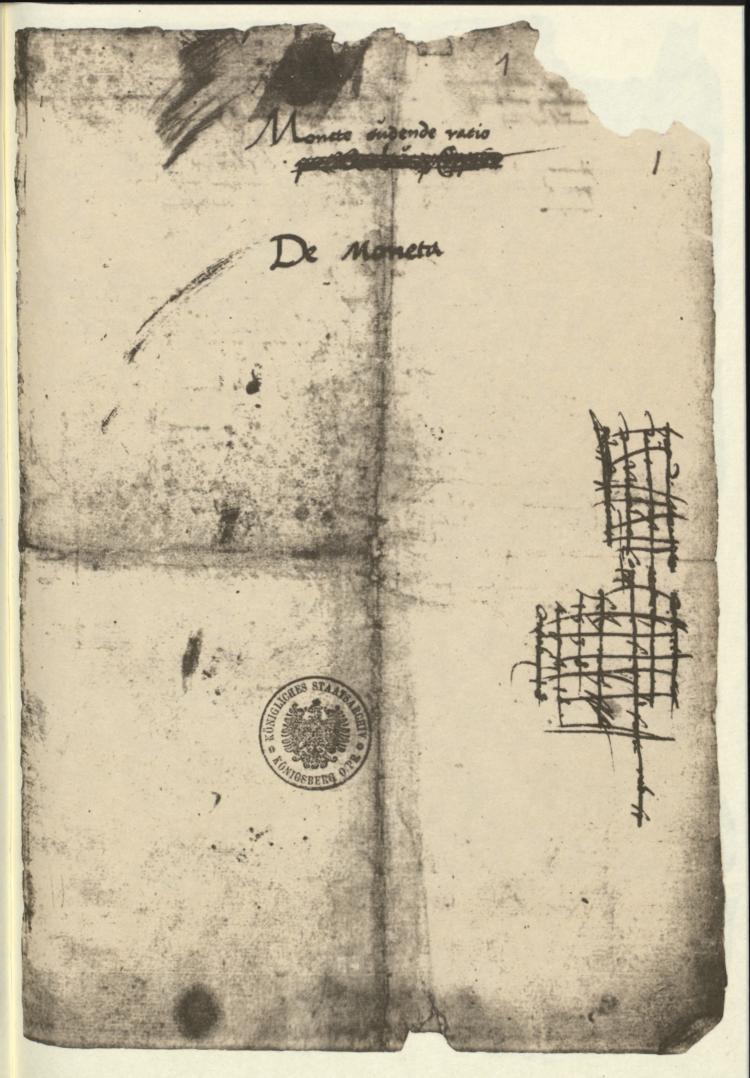

Inter des war auch der Gubernator in Schweden Stene Stuer aus Sceno Stockholm ausgefallen / vnb wehrete dem Konige / das er auch niche toider Swer. guffs Land aus den Schiffen kommen kundte / Alts er nun folden Rummer fa he/ond in den Schiffen groffer mangel an Bietnalien war / hat er fich auff den Schein gutelicher handlung geleget/vnd fürgeschlagen/ wie er einen ewigen Frica Den groifchen Bennentareten ond Schweben / auch feiner Derfon und bem Subernatorn auffriedten wolte / alfo das die Reiche zu Schweben hinfurder ben ihrer Regierung vigeferet bleiben / und bestendige zunersiche zwischen ihnen belictiget werden folte: Au folder abehandelung begerte er mie dem Gubernatorn

nem in suo ductu assequutus erat, graduum proxime 60, ex eo tempore successiue illi propior fiebat, adeo ve xxvi Die lanuarii, quo vltimò à nobis conspectus est, dunraxat 32 partibus à medio loco Solis remotus fuerit. Ideóque hac in renihil absoni protulic Mæstlinus.

Quòd vltimò ex Ptolemæo & Copernico insuper adfert, motus inæqualitatem constitui non posse, priusquam integram reuolutionem cognouerimus, ita vt quatuor momenta diuerfitatis requirantur, libi inuicem per Diametros opposita, videlicet extremævelocitatis & tarditatis, quæ cum in hoc Cometa haberi non potuerint, Hypothesi Moesthiniana ratam cerritudinem derogari; id non abs re quidem prolatum videtur. Reuerà enim perdifficile elt, nisi integra Renolutio constet, moruum particularium in equalicates tueri. Îm ò apparet, quanta difficultare, Planetarum, adeoque ipsius Solis & Lunæ Apparentiæ exacte dignoscantur, licet tot reuolutiones, vel vnig Hominis zuo, absoluant; Laudem nihilominus egregiam & eò maiorem admirationem meretur Mæstlini conatus, quod ex aliquantula portione circuli, de toto eius ambitu, ratiocinationem ingeniosam & arduam instituere non animum abiecerir, quam si ita vndequaq; perfecisset, vt Apparentiis per totam durationem Cometæ abunde sansfieret, rem sane præstitisset supra modum industriam, & approbatione dignissima. Imo & iple Copernico Octauz Sphzræ motum, siue Æquinoctiorum præcessionem vniuersalem extruere, licet à tot seculis, quibo Mortalibus innotuit, vix quintadecimam circuli partem, vt ipsemet faretur, peregerit, non tanquam impossibile, inractum reliquit. Isq, in Epistola quadam, quam manuscriptam habeo, ab ipso ad D. Bernhardum Vapooushy Cantorem & Canonicum Cracouiensem, Anno 1524, Die 3 Iunii daram, in qua Iohannis Verneri opusculum de motu Octaux Sphæræ examinat, de hac ipsa reagens, his verbis vtitur:

Nimia Octava Sphera tarditas, qua in aliquot anno-

rum millibus in seje non reuersaest, vi inequalitatis moto constet, non sinit id statim absoluere, quod multas Hominum atates excedit. Possibile tamen est, coniectura Kationali ad id peruenire posse, adiutos etiamnum aliquibus Observationibus post Ptolemaum adauctis, qua in eandem congruerint rationem. Nam qua determinata sunt, infinitam rationem habere non poßunt, quemadmodum si per tria punctanon secundum lineam rectam data, circumferentia ducatur, non licet aliam superinducere, qua maior vel minor fuerit, prius transmisa. Arquehæc illein modo citata Epiltola scripsit, cuius exemplar habeo ex ipsius Autographo, post secundam vel tertiam transcriptionem mihicommunicatum; ex quibus pater, iplum Copernicum, qui Ptolemeo facile in Scientia Altronomica æquiparando venit, non prorio irritum else, iudicalse, ex aliqua portione motus diligenter explorata, de toto eius circuitu ratiocinationem probabilein instituere, Id quod Mostlinus in huius Comera Hypothesi extruenda, pro viribus elaborauit, & non contemnendam in eo obtinendo nauauit operam. Sed de tota ipsius Hypothefi, qua huius Comece Apparentias exculare nititur, supra suo loco meam plenius dixi Sententiam, & quatenus ipsis Phanomenis satisfecerit, quatenus verò non, ex Observationibus certis Demonstraui. Ideoque de his longiorem hîc commemorarionem instituere non est necessarium.

Quæ de Helisæi Ræslin & Nicolai Vvinckleri Scriptis ibidem proponit Thaddaus, præcipua ex parte recté se habent, neque ego illis quidpiam nunc addendum censeo, præsertim cum iplemet suis locis de his ex professo satis luculenter tractem.

Postea digreditur Thaddæus in eruditam disputationem, ontra eos, qui Cometas nulla peculiare significatione obtinere, ieq; admirabiliores vulgaribo & consuens Meteoris else, editis ZZ 2

Epistola Copernici

Reverendo Domino Bernardo Vaporskir lantorii et Canonico Ecclesiae Cracovien, sis et S. R. Mª etc. poloniae Secreta, rio Domino et fautori suo plurimum observanto. S. D.

Cum pridem ad me milleres, op lime Bernarde, Joannis Venneri Nurenbergensis editum de motu octavae sphaereae opuseu. lum, quod a multis laudari dicebas, peliit ex me V. tra ut ei meam quoque sen, dentiam de illo significarem. Quod cer, to tanto liberdius fecissem, quanto hones. lius el revera a me guoque comendari poluisset, misi quod studium hominis et conatum landem el quod admonnist Stristoteles, Hon solum iis qui berre lo. susi sunt gratificandum esse philosophis sed et non recte locutis, quandoquidem mon parum saepe contulit etiam devia nolasse viam rectam segui volentibus. Cue, terum ad modicum utilis est reprehensio confereque parum quin et impredentis in, genii et mmum potius agere velle quam poetam. Iroinde et vereor ne mihi successeat aliquis si alium reprehen, dans quampin ipse non profero meliora. Laque volebam illa ul sund dimillere

curae aliorum alque sicul V. tua mentem meam accipiet, in summa responsum fuisse. m Verum cum animadvertam aliud esse mordere et lacessere quemquam aliud lastigare et revocare preamlem quemadmostrum vicissim lau, dare aliud est quam adulari et agere parasitum quem invenio, cur deciderio thro obsequi non deberom, quum harum rerum studio et diligen, lia qua praecipue polles derogare viderer ac proinde ne etasemel videar reprehendere homi, ami corrabor, quam de motu sphaereae fixarum stellarum erraverit, neque conveniat ejus traditio quum fortistari ad certioreum. huins rei capessendam rationem non parum eliam convect.

Primum igitur fefellið illum apputa, tio temporum, quod existimaverit ammum secundum Antonini Pii Augusti, quo P. Ptolemaeus observata a se fixa sidera in anno centissimo quinquagesimo; com surità le Vernerus prop. 18. secundum veritatem anno 139 - Ptolemaeus in lib: 3 magnae constructionis caport. 1 Observatum antomni agnovisscet ab Alexandri Magni morte anno 463 ait fuisse andonimi anno Lertio, a morte vero Alexandri ad Christ; mativitation numerans aunto pariter 323 et 130 dies. Nam a princopio regni Na, bonassaris ad Christi nativilatem suppu, Land annos pariter 747 et dies 130, de quo mon videor dubilari negue auclorem hunc ul adparet propositione 22, misi quo avoiler dies ums secundum canones Alphonsinos, idque ideo, quod Molemaeus incipil a meridie primi dici possionimenone paridin Bahay primi mensis that apur ae, gypilios annos Nabonasarios es seexambi

LXVI. 310

Magni, Alphonous autem a meridie ulli; mi dici mensis decembris annos Chri, sti supportamus. A Nabonassaro autem an excession alexandri Magni Ptole " macus codem lib. cap. 8, numeral amos 424, pariler cui adolupitatur Censori, nins de du natali ar f. C. soribers, auctoritate Marci Varorris relinquimms ergo ex annis 947 et 130. diebus, 323. annos el 130 dies vn (videlices) at Ale, Xandri morte av Christi nahvertateno alque himo as Prolemaci observationem iam dictama anno 139 et dies 303, mo Ergo, observatum a Ptolemaco acqui, noctium hoc automni constat fuisse a nativitate Christi annouin pa, rilium 140. 9 die mensis albit, Ro, manorum vero annorum 139 die 25 Septembris antomini tertio, rursum idem Ptolemaeus lib. 5 magnae const: cap. 3. in observatione: O et a anno secundo antenini supportat annos Nabonassarios 885 et 203 dies. Inissent ergo a Christi nativitate anni transacti pariter 138 et 73 dies. Ex onde post dies 14 nempe Thermai 9 que Ptolemaeus ar of Basiliscum Observavit eral a nativolate Christi Comanorum annis 139. 22 dus febru. arii , alque sic Antonini amis 2, Inem putat anctor iste fuisso 150, fefellit igilur se ipsum supra annos underin; ashur antem, si quis dubitat et his non contentus aupiat, etanhuius sei capere experientiam, meminisse debet, tempos esse ma, merum sive mensuram coeli motus

secuntum priores et poeteriores: hiro vide, licet anni menses, dies et horae nobis constant. Mensura autem et mensum vicissim se habent, relativa sunt enim. Porro canorres Itolomaci cum essent. adhuc executer a se observatis conditi, credibile non est erroren aliquem ab ho, minis serren perceptibitem vel disere, partiam continer quarrimes suis prin, cipies genous incumbant non cogno, verunt. Anae cum ila sitot: si loco O el a sirca Basiliscum organis astrolabicis inventa a Ptolemaco anno secundo antonini, 9 diebus Phermuli mensis, 5 horis et 1/2 a meridie transactis, per labulas i psius inquirendo mumeret, non inversiet la post amos Christi 149, sed poel 138 annos 23 dies el horas 51/2, gui sund Nabonassaris 885. anni dias 218 et horae 5/2. Ita cum error iste manifectus est , qui illius inquisitio, nem de motu 8 sphaereae plerunque inferit ubi kemporum facit mentionem. Mins error est mon mirror praecedent: in ipsa eins hypothesi, in qua existi; mat 400 amis anno Plolemaci acque, di tantum moro mota non errantia sidera mutata fuisse, quae no apereius, quod inferius dicernus, magisfque perspi, ena frant ammavertendam puto, seien, ciam stellarum earum esse quaecunque praepoiters egnoscimos a nobis quem secundum naturano. Quemadonohum verbs gratia: Prins natura novit Viciniorese our lerrae planetas quam fra sidera, deinde quae sequintur ut mims vibrantes appareant.

Hobis e contrario antea visi sunt planetae non skintillare et exime cognitu propinquiores esse sphaerae. Ita pariforamiles prins deprehensum est a mobis inaequales videri stellarum motis postea Epicyclia esse eccentros alionumos evenlos, quibus ita ferra, mus ratiocinantes atque i des dictum i'd esse velim quos aporturit poriscos illos philosophos primum loca stella, rum Instrumentorum artificio nota, ne tum temporum intervallis et la tanquam manuscritione quadam. de infimita quaestio de motor coeli remaneret. Rationem aliquam de ins certa percurrotari quam summi visi sint invenisse. Quanto consideratis visisque stellarum locis abstrpulatione quanto omnibus conveniat itta el de motu 8 sphaerae se habel quem prisci Mathematici ob miniam ejus tardi. datem nobio av plomm tradere non potnerunt ser vestigis comm sequenda sunt investigare eum volentions eorum considerationibus terms lesta. mento relictis inhaerendo. anos si quis suo sensui inhacreus putaverit illis non concedentani in hoc certe homini clausa est janua huius artis, et ente ostium recubans aegro, Rantium somnia de motu 8 sphaerae sommabil et merito. Elt puta qui per illarum calumniam existima, verit suae hallulination sub, verniendum. Constat autem illos summa diligentia et solerli ringenio illa omnia observasse quam multa

et praeclara inventa et almiratione digna nobis relinquerunt gram ob rem persuadere mihi hand quaquam possum in accepientis stellarum locis cos errasse vel in quarta , vel in quinta vel eliam sexta parte mins gradus wit antos existimas, de que postea latins. Illud guoque practereuniem non est in ammi motu siderio cui diversitas. inest Lotum revolutionem ante omnis desiderari in qua i Welligemms omnes motus apparentes differentias per, Fransivisse, Irversitas non apparens in moter est grow imperit us per parles tota revolutio el aequaliter motios mensurari non possis. Jed sicut in inquisitione cuiusque in, maris Pholemaeus el ante eum Hip " parchus Khoris magna ingenii sagaertate consideraverunt aportere qualtur momenta in revolutione diversitatis opposita sibi i nvicem per diametros ul puta extremae velocitates et Farritatis et ntrobique per Aransversum amborum aequa, litatem mediantiam ambientium quadrifariam secantia execulum fitgue nt impromo quarante velo, cissimms decreseat motors in alters diminuare mediis et juveum crestat larvissimos in lertio quarbante al. qualis in quarto. Qua imestria scire potnermt ex observatis inspeclisque a prolibus in qua circuli portione quolibet tempore verteretur, ac prointe cum similis molis redisset rutellexerunt iam factum

inaequalitatis revolutionem sireastoonem. Quem admodum hac latins magnae con, Arnotionis lib: 4. Ptolemacus explica, vit quod stiam in inquisitione motus Octavae sphaereae erat observamm. Ver minia eins ut dixi, tarbitas qua in annorum millibers nowbum in sese reversorum inaequalilatis motios satis constat. non sunt id station absolvere quas mullas hominum acta, las excepit. Possibile tamen est conjectura Mationabili ad it pervenire posse adia. las etiamnum aliquibus observationibus = Holemaci adjustis quae in camdem con, gruerist rationem. Nam quae deter, minata sunt informam sationem habere non posse quemaismohim si per tru puncta non secunhun sectam bream posita corennferentia ducatur mon licet aliam superinducere quae maior vel moror querit prins trans, missa. O er de his alias not revertar ad it unde sigressus sum. Videnhum 'gitur nobis mme est an recte se ha. beat quot d'cit non errantia sittera 400 ante Ptolemaeum annis aequali solum modo mota fuisse mutata. Yorro ne verborum significations fellamur aequa, tem accipio motum quem el mediocrem dare solevius qui sit intertardissimum et velocissimums medius, ne circum Verriat nos quod in corrolario prime "" propositionis dicit terriorem esso motium fixorum siderum, nos penas man hypothesin aequalem pont. m Catherum velocionum prosinte de si mingram futurus sit taritios, in

quibus hand seis, an sibi ipsi constet amillo tarviorem poetea adducens asse, puit antem aequalilalis argumentum ex uniformitate quae fixa sidera tanlisper a primis stellarum fixarum observationi, bus Aristarcho et Timochere usque Itale, macinn ac peraequalia temporum inter, valla, ul junta per singulos amorum centenarios virigulos proximal gratus pertransiverint, us apris Ptolemacum satis apparet, repetitum at auctors proposid VII. Ler his Lantium mate, maticus existens non advertit quod milla therous esse potent, not eirea mo, menta aequalitatis, hoc est sectionis circulorum audipticae 10 sphaerae et drepidationis ut ille vere uniformior avpare stellarum motus quam aliti quando contrarium eius segui necesse let, nt tum maximi verum apparent, minime vero quando velocossomos vel fairbusimus est motios arparens. Chood vel ex sua psins hypothesi et constructione debebat afinimadvertero et tabulis inte contextis praesertim seltimo canone quem as revolutionem Artins magnalitatis sive tripidationis exemplificavit, noi a 200 annis a nati; vitate Christi secumbun praccedentem supportationen in primo amorum sentenario reperitur motos adparens scrupulorum primorum 49 dun, Laxat mins grains, in altero cente, nario scrupulorum primorum 57. Dernde ab ipsa malivitate Christi per priorum amorum centenerium Dransmulatae finsent stellae gradu uno et decima fere poirte unius in eodern gradu

1/4 fere, not paulo mimo sextante unius gradus se invicem excedant motios sub acqualibus temporum spatiis. Quod si forijigas 200 annorum utrobigne motum deficiet informo intervallo a inobus gravious phis quam quinte pars mins. In covern autem supperabled prope unins quadrantem siegue vursus sub aequalibus temporibus excelet motus sequens praecedentem in dimitio gravn et parte quinto decima fere, Cum antes centes mo graque anno singulos pertransisse gradus stellas fixas, Holemaes credens detulisset\_ E contrario vero eadem lega assump, Horum a se execulorum in velocissi, mo motu oclavac sphaerac contin, get ul in 400 annis vix unius scrupuli differentia in motu appa, rente reperiatur. Quem admobum videre licelab annis Christi 600 usque as 1000 in gooden canono similiter el in larvissimo a 2,060 annis in subsequentes 400 et ratio diver, sitatis est quia no dictum est superius in uno henricyclio trepi', dationis, videlicet tarvitate an summan velocotatem aderescit semper aliquid motur apperenti et in altero semisirculo qui a sum, ma velocitate, continuo decrescit motivo qui antea creveret, filque summa augmentatio et dominutio in punctis dequalitatis e diametro appositis, areo ul in motu appa, rente non sit reperisse motios aequa, les in duobus continuis temporum

spatiis, quam alter altero maior. and tarditatis extremitates uli dumtarat ultro citroque aequales cir, sumferentiae pertranseunt, temporis aequalitate, atque incipientes vel desin nentes augeri vel minni, mutua time fere compensatione coarguant. Nulla ergo ratione convenit medium motum fuisse cum qui in 400 amis ante Holemaeum, ser Tarkssimum polins eum eliam non vibleam eur alium divinemur tarbiorem de quo millam consicturam hacternos habere potnimus cum ante Timocha, sem mila stellarum fixarum adnota, tro facta sit gnae av nos usque per verisset, ser negne av Vlolemaenn rum velocissimus eliam molis iam proeterierit, consegnens est in altero a to lemaco semi circulo, iam nos esse in que d'minuitur motive unius etien mon morica pars praeterverit, Elaque morum videri non debet, quod non potnerit hise suis assumptionibus proposius accedere av ea, quae sunt ab antiquis annotata putaveritque illos aberasse in quarte vel quinta parte unius gravus sine etiam MI dirmidia et empleus eun tamen in mella parte Plolemaeus mais, rem videatur avhibuisse diligentiam, gram ut nobis not errantium stellarum motum sine vitio tra, deret, attendens quod non misi immobile eins particula id sibi finisset concession quia universum illum circuitum conjecturos esset Mbi error quantumlibet sensibilis interveniens in Tota illa vastitate insignis minimum poterat eveni, re. Ideogne Timochari alexandrino Tristarchum avinnaisse vodetur co, actaneum, et llevelas Homano agrippam Bilhymum, no sic etiam in tanta locorum distantia illis consendientions verissima haberet, et indubitata lestrmoma, que minus ever bile sit eas vel Thole, macum in Ranto errasse gn' multo alia etiam difficiliora av extremum ut aiunt unquem deprehendere potnerunt.

Willo demum loco ineptios est quam in XX 11 propositione et praesertin corrolario einosdem, dum opus hoc sum commendare volens read Firmotheren circa dua stello nt pote aristam M et eam quae en tribus in fronte scorpii borealior est, quos supportatio em illa tefricat, in has antem abunded, who vimis puerititer halluciratur. Cum vero sit ea dem utrinsque stellae distantia inter Timocharem et Holemaeun consideratarum nemque gradni 41/2 sub aequali fere temporis differentia. Utque mimerus sup, putationis illins ac proinde idem proxime mihilo tamen magiv arvertit quam grains 4 Scrupul: 7 avvita loco stellar gram repit Imochares in 2 merito non possent supportari 60 gradus el scrup. 20 mg.

nbi Plot: ipsam invenit, et e con, verso idem numerus exetitur ex 26 gradibus et 40 perupuli. Ariste lidem Pholemacum usque av grasus 225/13 redire nt par est non potwit ser videbal in 22 grain el sorupulis 32. Ita existimatur illic defecisso calendum quanto his abundasset, languam in observationibes have "rici", disset diversilas vel quasi ex Alhenia in Thebas es e Thebis in alherras earlem via nom sit. Alioquin si Mrobique vel addidisset mmerum vel sub " direiset ut pariter res postulabat, invenissed intique earen more sese habere, alle eliam quod revera non um ami 443 ser 432 John Ma principio declaravi - proinde bre, viori temporo minorem esse mime, rum opportet ut non solum in scruperlis 13 ser in driente unius gradus ab observato stellarum motu dissidebat. Ita exrorem huic suum imposuit. Timochani vix evadenete Holemaco at dun existend illo, rum arnotations bus amnem folem quod alind pestal quam ut suis quoque observationibus mims cre, derem. Et have de in longilurbruem moter VIII sphaerae. Egun bus eliam facile potest intelligi quoi de motu groque delinationis existimantum sit. Imothit nempe yosam che, abus und aid drepidationibus in se redescendam hunc supra pori, mam, sed dissi patio ipso jam

fundamento necessi est not super aevificata cormant, informaque sint as minus sibi invoicem cohe, rentia quia demum ipse de motu non errantium shellarum sphaerae sentiam, quoniam allis loco deili, mata sunt super fluim putavi et impertinens his amplius i'unno, rari eum satis sit si morb deside, rio luo satis fecerim ut ammia, quae a me exigebas de isto opusculo habeas sententiam.

Valeat V. huaquam fanstraime.

Has artes teneris annis studiosa Iuuentus
Discito, Mensuras quæ numerossis docente
Premia nanque seres suscepti magna laboris,
Ad cœlum monstrant hæctibi scripta uiam.
Qua patet immensis spacijs pulcherrimus orbis,
Si metas horum cernere mente uoles.
Sidera uel quanam cœli regione uagentur,
AEterni cursus quas habeantsis uices.
Cur Luna inuoluat cæca caligine fratrem,
Cur Lunæ usuram lucis & ille neget
Venturos etiam casus quæstata gubernent
Quas populis clades astra inimica ferant
Hecsi nosse uoles, prius est doctrina tenenda,
Quam breuirer tradunt hæc elementa tibi.
Cunq hominu mentes, quæ cœlo semina ducunt,
Errent a patria sede domoss procul,
Hæc doctrina ipsas terrena mole solutas
Cælesti reduces rursus in arce locat.
